

an affordable option  
and fun too

Even entry level sailing *has* been expensive  
until now ~ *with the Tera sailing dinghy...*

roto-moulded in maintenance free mettalatek polyethylene ~  
absorbs blows ~ 5 times stronger than GRP ~ osmosis free ~  
double skin stress free construction gives built in buoyancy ~

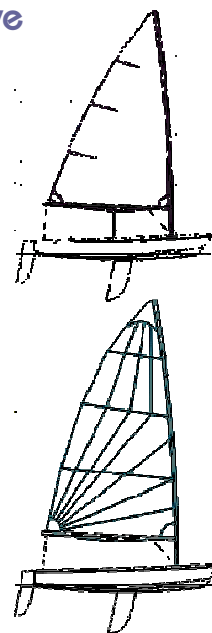

designed by Paul Handley, renowned for the highly successful RS Feva  
and the award winning K6 Keelboat, using the latest CAD technology.

manufactured after extensive prototype testing by

*Sport and Pro ~ from the same mould*

- Stylish - thoroughly modern and looks great...
- Safe - unsinkable, strong, comfortable and clean layout
- **Quick to rig** - the single-sail rig can be set up in minutes
- **Easy to sail** - stable, chine form is well mannered in all conditions
- **Fun to sail** - responsive in light wind and planes readily in a breeze
- **Capsize friendly** - it happens - self-draining cockpit and righted with ease
- **Easy to handle** - light enough for youngsters to launch and recover unaided
- **Transportable** - easy to transport by roof rack, compact to store between use
- **Robust** - durable, maintenance-free polyethylene sandwich construction
- **Flexible fun** - rowing by children or adults or simply messing about...
- **Affordable** - get afloat and sailing for an amazingly low price

*Entry level Tera Sport has a high impact, ultra stiff, mettalatek moulded hull*

*In this youngsters will learn quickly the sailing basics ~ for example to stage 1 and 2  
of the RYA Youth Sailing Scheme ~ and progress to performance sailing as skill and  
bodies grow. When ready they can move on to the Pro rig for even more fun...*

*The Sport comes with:*

- 3.7 m<sup>2</sup> half battened dacron sport sail
- low drag polyurethane moulded foil section dagger board
- lifting polyurethane moulded rudder blade
- self draining cockpit with removable bung
- protective boom padding
- nylon rubber gudgeons
- toe strap
- aft handholds
- rowlock sockets
- 2 inspection hatches
- lifting handles with rubber grip
- water bottle

length: 2.87 metres beam: 1.27 metres weight: 33 kg
